## **Parking**

In the courtyards of the condo buildings there are 4 outside parking spaces that are intended for overflow parking use by those who live in units 102, 202, 103, 203 whose garages open onto the courtyards. Those who live in units 101, 201, 104, 204 whose garages open onto the street have their overflow parking in front of their garage doors in their driveways. Similarly, the Villas have their overflow parking in front of their garage doors in their driveways. By overflow parking, we mean parking for one resident second car or one guest car.

An exception is Building 101, where there are only 2 extra parking spaces in the courtyard with the other 2 located off of Woodbridge Dr. on the left, just past our pillars as you enter Fairway Glen. There are also a number of additional overflow parking spaces ... near the sidewalk to the gazebo, at the mail boxes, between Buildings 111 and 115, and just past Villa 126.

Here are a couple of common sense suggestions for handling your overflow parking needs in a manner courteous to your neighbors:

- If the overflow parking spaces within a courtyard are full, please do not park in the middle of the courtyard, potentially blocking someone from exiting their garage.
- Use the extra spaces mentioned above, that are outside of the courtyards, for overflow guest parking.
- If those extra spaces are full, have your guests park on the street, but not straddling the sidewalk and blocking pedestrian traffic.
- There is plenty of room around the cul-de-sac for temporary overflow parking.
