4			
4.		eet of the insi	ttachment: What is the <u>WEAKEST</u> roof to wall connection? (Do not include attachment of hip/valley jacks within ide or outside corner of the roof in determination of WEAKEST type)
	Ш	A. Toe Nai	
			the top plate of the wall, or
			Metal connectors that do not meet the minimal conditions or requirements of B, C, or D
	Mir	nimal condit	tions to qualify for categories B, C, or D. All visible metal connectors are:
			Secured to truss/rafter with a minimum of three (3) nails, and
			Attached to the wall top plate of the wall framing, or embedded in the bond beam, with less than a ½" gap from the blocking or truss/rafter and blocked no more than 1.5" of the truss/rafter, and free of visible severe corrosion.
		B. Clips	
			Metal connectors that do not wrap over the top of the truss/rafter, or
			Metal connectors with a minimum of 1 strap that wraps over the top of the truss/rafter and does not meet the nail position requirements of C or D, but is secured with a minimum of 3 nails.
		C. Single V	
			Metal connectors consisting of a single strap that wraps over the top of the truss/rafter and is secured with a minimum of 2 nails on the front side and a minimum of 1 nail on the opposing side.
		D. Double	Wraps
			Metal Connectors consisting of 2 separate straps that are attached to the wall frame, or embedded in the bond beam, on either side of the truss/rafter where each strap wraps over the top of the truss/rafter and is secured with a minimum of 2 nails on the front side, and a minimum of 1 nail on the opposing side, or
			Metal connectors consisting of a single strap that wraps over the top of the truss/rafter, is secured to the wall on both sides, and is secured to the top plate with a minimum of three nails on each side.
		E. Structura	Anchor bolts structurally connected or reinforced concrete roof.
		F. Other: _	
		G. Unknow	yn or unidentified
		H. No attic	access
5.			What is the roof shape? (Do not consider roofs of porches or carports that are attached only to the fascia or wall of e over unenclosed space in the determination of roof perimeter or roof area for roof geometry classification).
		A. Hip Roo	
		B. Flat Roc	
		C. Other R	less than 2:12. Roof area with slope less than 2:12 sq ft; Total roof area sq ft oof Any roof that does not qualify as either (A) or (B) above.
		C. Other K	Any roof that does not qualify as either (A) of (B) above.
6.	Sec	A. SWR (a sheathin	ter Resistance (SWR): (standard underlayments or hot-mopped felts do not qualify as an SWR) lso called Sealed Roof Deck) Self-adhering polymer modified-bitumen roofing underlayment applied directly to the go or foam adhesive SWR barrier (not foamed-on insulation) applied as a supplemental means to protect the g from water intrusion in the event of roof covering loss.

^{*}This verification form is valid for up to five (5) years provided no material changes have been made to the structure or inaccuracies found on the form.

7. <u>Opening Protection</u>: What is the <u>weakest</u> form of wind borne debris protection installed on the structure? **First**, use the table to determine the weakest form of protection for each category of opening. **Second**, (a) check one answer below (A, B, C, N, or X) based upon the lowest protection level for ALL Glazed openings **and** (b) check the protection level for all Non-Glazed openings (.1, .2, or .3) as applicable.

Opening Protection Level Chart Place an "X" in each row to identify all forms of protection in use for each opening type. Check only one answer below (A thru X), based on the weakest form of protection (lowest row) for any of the Glazed openings and indicate the weakest form of protection (lowest row) for Non-Glazed openings.		Glazed Openings				Non-Glazed Openings	
		Windows or Entry Doors	Garage Doors	Skylights	Glass Block	Entry Doors	Garage Doors
N/A	Not Applicable- there are no openings of this type on the structure						
Α	Verified cyclic pressure & large missile (9-lb for windows doors/4.5 lb for skylights)						
В	Verified cyclic pressure & large missile (4-8 lb for windows doors/2 lb for skylights)						
С	Verified plywood/OSB meeting Table 1609.1.2 of the FBC 2007						
D	Verified Non-Glazed Entry or Garage doors indicating compliance with ASTM E 330, ANSI/DASMA 108, or PA/TAS 202 for wind pressure resistance						
N	Opening Protection products that appear to be A or B but are not verified						
IN	Other protective coverings that cannot be identified as A, B, or C						
Х	No Windborne Debris Protection						

a minimum, with impact resistant coverings or products listed as wind borne debris protection devices in the produ	ct approval
system of the State of Florida or Miami-Dade County and meet the requirements of one of the following for "Cycl	ic Pressure
and Large Missile Impact" (Level A in the table above).	

- Miami-Dade County PA 201, 202, and 203
- Florida Building Code Testing Application Standard (TAS) 201, 202, and 203

☐ A.1 All Non-Glazed openings classified as A in the table above, or no Non-Glazed openings exist

- American Society for Testing and Materials (ASTM) E 1886 and ASTM E 1996
- Southern Standards Technical Document (SSTD) 12
- For Skylights Only: ASTM E 1886 and ASTM E 1996

☐ C.3 One or More Non-Glazed openings is classified as Level N or X in the table above

• For Garage Doors Only: ANSI/DASMA 115

☐ A.2 One or More Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings classified as Level B, C, N, or X in the table above
☐ A.3 One or More Non-Glazed Openings is classified as Level B, C, N, or X in the table above
B. Exterior Opening Protection- Cyclic Pressure and 4 to 8-lb Large Missile (2-4.5 lb for skylights only) All Glazed openings are protected, at a minimum, with impact resistant coverings or products listed as windborne debris protection devices in the product approval system of the State of Florida or Miami-Dade County and meet the requirements of one of the following for "Cyclic Pressure and Large Missile Impact" (Level B in the table above):
• ASTM E 1886 <u>and</u> ASTM E 1996 (Large Missile – 4.5 lb.)
