

## **Propane Gas Rule**

Subject to the following restrictions, Propane Gas Tanks are permitted in all new installations, with ACC approval, provided that:

- Propane Storage Tanks shall be installed underground
- Twenty (20) pound BBQ and outdoor cooking Propane Tanks may be stored on a BBQ cart or cooking grill above ground

It is recognized that builders installed a 20-pound Propane Tank at or near the fireplaces of some homes 25 years ago, subject to restrictions noted below.

Current policy shall guide any future requests for Propane Gas Tank installations.

At first opportunity, the CCRs will be amended to reflect the above changes.
